Answer
There currently is not a way to hide the patron alternative email field within the Profile tab.

However, you can overwrite the alternative email with your regular patron load. In your ongoing patron load, include the standard patron email in the notificationEmail column. This ensure that any alternative email entered will be overwritten automatically with each patron load.

You will also want to make sure the patron email field is not editable in the patron request form. The email field will prepopulate based on the patron’s record and cannot be changed when submitting the request. If you anticipate questions from your patrons, you may also use the note field on the request form to explain why the standard email is needed for a request.
