The request window only opens in a minimized tab along the toolbar, why is this occurring?

Last updated: Fri, 06 May 2022 20:41:46 GMT

Symptom

- Why is the request window only open in a minimized tab along the toolbar?

Applies to

- ILLiad

Resolution

If this occurs with each request on your machine, the minimize button on your toolbar has likely been checked. Right-click on a request and hit Maximize instead, "uncheck" the Minimize button.

Another option is that you might have to click on the down-arrow for where the toolbar is located and click on "Show Quick Access Toolbar Above the Ribbon."
