How does AutoClearPreRegisteredUsers work with new patrons authenticated through any other way than ILLiad Authentication?

Last updated: Thu, 09 Sep 2021 14:43:50 GMT

Applies to

• ILLiad

Answer

It means that when the patron is authenticated, the patrons will be automatically cleared. More information is found in the [RemoteAuth: Customizing Settings](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/RemoteAuth_and_Correcting_Issues) and the [LDAP Authentication: Authentication Process](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/RemoteAuth_and_Correcting_Issues) documentation pages.
