I just purchased access to a licensed database, what do I do now?

Last updated: Mon, 28 Feb 2022 13:44:58 GMT

Applies to

• WorldCat Discovery
• WorldShare Collection Manager

Answer

1. **Activate the databases** to search in WorldCat Discovery
   ◦ This is done through [Service Configuration > Metasearch Content > Default Databases and Licensed Content](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/I_just_purchased_access_to…)
   ◦ Refer to the [Available collections and database list](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/I_just_purchased_access_to…) to see if your database is available through OCLC and which tab you will find it under
   ◦ Note: It is not recommended that you toggle Treat as Held to on.

2. Take this opportunity to look at your **Configured Database Groups** and add the new database to your searching.

3. **Add the Knowledge Base Collection in Collection Manager**
   ◦ Through [Metadata > Collection Manager](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/I_just_purchased_access_to…) search for the collection with **My Selected Collections** unchecked
   ◦ Click Select on the relevant collection

4. **Check if you need to configure Provider Settings**

Note that it can take up to 48 hours for indexing to complete so you can access the links.
