Release Date: November 13, 2021

Introduction

This release of WorldShare License Manager adds support for the COUNTER 5 IR Item Master Report and IR Journal Article Requests Report in addition to additional enhancements and bug fixes.

Many of these improvements are the direct result of your feedback.

New features and enhancements

Additional COUNTER 5 Reports Available for Harvesting

With WorldShare License Manager, we continue to build on the adoption of COUNTER 5 across libraries. Statistics gathered from COUNTER-compliant vendors help to inform your decision making as you select and maintain your library’s e-resources. With this release, we are happy to announce License Manager offers both automatic and manual harvesting of two additional COUNTER 5 report types. The following reports are now available for harvesting in addition to the TR, TR_J1, TR_J2, TR_J3, TR_J4, TR_B1, TR_B2, TR_B3, DR_D1, DR_D2, PR_P1, IR_M1:

- IR Master - Item Master Report
- IR_A1 - Journal Article Requests Report

Since COUNTER 5 is being deployed by many vendors, you may find it useful to visit COUNTER.org for a full description of the standard.

Contact OCLC Support to enable the use of these new reports with supported vendors.

Increased Character Limit for Document Labels

In WorldShare License Manager, you are able to attach documents to your licenses. During the attachment process, you can choose to add a label to the document. The character limit for this label has been increased from 40 characters to 255 characters. This allows you more flexibility in providing descriptive labels on your documents.
Improvements and Bug fixes

- The Public Notes Display template can once again be used to configure notes in other languages, including French. Previously, the template was not updating the content of the notes when certain language characters were used.
- You can now sort the Harvest History details table by Delete Date and see the correct sort order.
- The Harvest History details table now reflects a more informative name label to allow you to identify the content in the table at a glance. The updated label includes the Vendor Name, Vendor ID, Counter Type, and Harvest Type.

Known issues

- There are no known issues to report currently.
