Why am I receiving an error when I try and access the WC Search API v2 using our V1 key?

Last updated: Mon, 01 Nov 2021 21:33:16 GMT

Applies to
- WorldCat Discovery
- WorldCat Search API

Answer

In v1, you put your key into the end of a URL:

https://americas.discovery.api.oclc.org/worldcat/search/v2/bibs/41266045?wskey=OUR_VALID_KEY

In v2, you will need to use an access token. You can obtain one by following the directions on the OCLC Developer Network Access Tokens page.
