Why doesn't the call number on the MARC record I received match the call number on the label our vendor supplied?

Last updated: Tue, 16 Nov 2021 16:42:41 GMT

Applies to

- WorldShare Collection Manager

Answer

In order to make sure the call number in your library's MARC record matches the one from your provider, please be sure to choose the option to get the call number for items through cataloging partner options.

This can be done in **WorldShare > Metadata > Institution Settings > MARC Records > Customize Records**. You will need to add a field for call number - for example, a 949 $a field.

You can then select Cataloging Partner Data from the dropdown menu and select **Call Number**.

For more information on Copy Call Numbers, see [Copy call numbers from WorldCat records to your records](https://help.oclc.org/Metadata_Services/WorldShare_Collection_Manager/Troubleshooting/Why_doesn_t_the_call…).
