When I do a keyword search, I get a list of bad results.

Last updated: Tue, 07 Dec 2021 16:33:51 GMT

Symptom

- When running a keyword search under the “Title” filter for a term like “nursing”, there are hundreds of results that are not about nursing. The results are titles that are in a collection that has the word nursing in it.

Applies to

- WorldShare Collection Manager

Resolution

The WorldShare Collection Manager search engine is not a keyword search. The intended use for the title filter is to use exact search terms like ISSN, ISBN, or OCLC number.
