Introduction

Release Date: January 12, 2021

Relais 2021.4

New services/application updates:

- Windows hosted and client side applications have been updated to utilize the latest .NET RequestFlow rules based on SQL query syntax

Bugs exterminated:

- Zendesk ticket: 477945 - ensure DeliveryEmail application does not send an email to the requester when the image associated with a request cannot be found

Portal 3.8

New features are available in Portal 3.8:

- Staff substitute (super) user - this feature enables customers operating in a shared Relais system to designate staff as a "substitute (super) user". This designation will enable substitute users to switch to and act as another institution staff member when deemed necessary.

Staff Portal improvements based on customer feedback:

- Addition of a configurable call number override to ensure, for e-resource material without call numbers, that the grid of requestable locations presented to staff can include these items
- Enable copy and paste from pinned unparasable alert
Recommended actions

We encourage you to review all of the items in the release notes to determine whether there are other items that might require additional action or follow up by your institution.

Administrative actions

These items require immediate action or decisions.
