All my patrons are signing in with the username Shibboleth in EZproxy, what should I do to possibly fix this?

Last updated: Tue, 07 Jun 2022 19:05:42 GMT

Symptom

- All your patrons are signing into EZproxy with the username Shibboleth and you want this fixed.

Applies to

- ILLiad

Resolution

Here are some possible solutions to fix the issue with all the patrons signing into EZproxy with the username of Shibboleth:

1. Edit your shibuser.txt:

   ```
   If auth:NameID ne ""; Set login:loguser = auth:NameID
   If auth:NameID ne ""; Set login:user = auth:NameID
   ```

2. See if the Why is my username showing as shibboleth after upgrading EZproxy help article fixes the issue.
