WorldShare Record Manager

Last updated: Wed, 08 Nov 2017 19:20:51 GMT

WorldShare Record Manager allows you to create new and enrich existing items in WorldCat with efficient, record-at-a-time metadata management for your physical and electronic materials using either a MARC 21 editor or a Text View editor. Plus, with Record Manager, you can set and delete WorldCat holdings and export bibliographic records.

Record Manager - Nederlands

• Get started

  Get started with WorldShare Record Manager.
  ◦ About Record Manager
  ◦ Record Manager account roles
  ◦ Contact OCLC Order Services
  ◦ Keyboard shortcuts
  ◦ Set or reset your password
  ◦ Set preferences
  ◦ Sign in to Record Manager
  ◦ WorldShare Record Manager (Nederlands)

• Search

  Record Manager provides a variety of methods to search and browse WorldCat holdings. You can also set your search preferences to suppress authority and bibliographic search scopes and indexes.

  ◦ Advanced

  ◦ Search preferences
  ◦ Search results
  ◦ Search result record summary
• Authority records

No image available

Record Manager supports the following authority records: Library of Congress, Medical Subject Headings (MeSH), Dutch (NTA), Māori, and German (GND).

◦ Work with authority records
◦ Export authority records
◦ Record Manager Authorities Guide

• Bibliographic records

No image available

Record Manager allows you to create new and enrich existing items in WorldCat using either a MARC 21 editor or a Text View editor.

◦ MARC 21 view
◦ Export MARC 21 records
◦ Text view
◦ Bulk actions

• Constant data

No image available

With Record Manager, create constant data records for bibliographic and local holdings records to develop and maintain standards for use in all bibliographic or local holdings records, certain collections, or specific types of resources.

◦ Bibliographic
◦ Local holdings records

• Field strings

No image available

When you are editing a MARC 21 WorldCat record or LBD information, you can save frequently used variable field information as a string that can be copied to other fields.

◦ Work with field strings

• Labels

No image available

You can create spine labels from information in an MARC 21 WorldCat bibliographic record or a local holdings records. Your list of labels is only viewable by you and not by other users in your institution.

◦ Add records to a label print list
◦ Delete records from label print list
Edit a spine label
- Label preferences
- Preview labels
- Print labels
- Select starting position for a label print job

- Local bibliographic data

  No image available

  Using local bibliographic data (LBD), you can add local information to a bibliographic record that is specific to your institution’s title; however, other institutions will not be able to see that information in the MARC 21 WorldCat record and your users will only see your institution’s LBD.

  - Work with local bibliographic data

- Local holdings records

  No image available

  Using Record Manager, you can create and edit WorldCat local holdings records (LHRs). You add an LHR record to a MARC 21 WorldCat bibliographic record.

  - Build an automated LHR summary
  - Change the location for multiple LHRs
  - Delete an LHR
  - Derive an LHR
  - LHR fields
  - Move an LHR to a different WorldCat record
  - Reformat an LHR
  - Update an LHR
  - Validate an LHR record
  - View LHRs

- Text strings

  No image available

  When you are editing a MARC 21 WorldCat record or local bibliographic data information, you can save frequently used variable information as a string that can be copied to other fields.

  - Work with text strings
