Can collections be sorted by administrative metadata fields?

Last updated: Tue, 19 Jul 2022 12:22:14 GMT

Applies to

- CONTENTdm Administration
- Website Configuration Tool

Answer

Yes. Administrative metadata can be configured in the Field Properties section of CONTENTdm Administration. Change the default Hidden property of the desired field to the "No" setting. Then refresh the Website Configuration Tool, and the metadata field should now be among the dropdown options in the Search & Browse > Results sections of the WCT.
