When doing an Advanced search in WorldCat Discovery I get an "oops something went wrong" page.

Applies to
- WorldCat Discovery

Symptom
- This happens when creating a search WorldCat Discovery Advanced Search using Database filters to only search specific databases.

Resolution
Verify that WorldCat.org is selected as a database alongside any other specific databases chosen for the search.

Additional information
Default Databases and Licensed Content

Why am I getting an Oops error when I go to my institution's Discovery URL?
