Insight Builder
Last updated: Mon, 24 Oct 2022 15:42:36 GMT

Allows users to perform detailed collection comparisons at the individual and group level. Collection comparisons are made between two groups: the My Libraries group (A), which consists of one or more holding symbols from your institution, and the Comparator Group (B), which consists of holding symbols from libraries or lists that you choose to compare to.

Groups

My Libraries (A)

Your My Library group will be automatically configured when your Choreo Insights account is initially set-up. This group is configured based on your institution’s WorldCat holdings symbol(s).

Comparators (B)

Comparator groups are created by selecting other libraries’ monograph collections from a list on the Comparator Group page.

Analysis Type

Compare your monograph collection (Group A) to the monograph collections of other libraries (Group B) using one of four different analysis queries.

<table>
<thead>
<tr>
<th>Analysis Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>Show titles held by either Group A OR Group B</td>
</tr>
<tr>
<td>Overlap</td>
<td>Show Titles held by Group A AND Group B</td>
</tr>
<tr>
<td>Distinct</td>
<td>Show Titles held only by your library or group (Group A)</td>
</tr>
<tr>
<td>Gap</td>
<td>Show titles held only by your comparator libraries (Group B)</td>
</tr>
</tbody>
</table>

Search Options

Within the analysis type you can segment your collection using attributes to focus on specific parts of your collection.
Subject Search

Note: based on WorldCat data

• LC classes, subclasses, ranges
• Dewey classes, subclasses, ranges

FAST Subject Headings

Use FAST subject headings to look at specific topics. To use FAST subject headings:

1. Search for the appropriate headings using the search box
2. Select those you wish to add to your search

If necessary adjust the "rows per page" to show longer lists of matching terms.

FAST (Faceted Application of Subject Terminology) is derived from the Library of Congress Subject Headings (LCSH), and is one of the library domains most widely used subject terminology schemas. The development of FAST has been a collaboration of OCLC Research and the Library of Congress. Work on FAST began in late 1998.

Visit, FAST Subject Headings for more information.

Format

Print, Electronic or both (default is both)

Publication Date

Place of Publication

Usage

Circulation usage data is included for WMS libraries only.

Language

Language of titles

Academic Programs

2 and 6 digit CIP (Classification of Instructional Programs) codes which are mapped to LC Class ranges. Use this option to look at titles which support specific curriculum offering at your institution.
