Learn how to run a query.

Run a query

To run a query from the Choreo Insights dashboard:

1. Choose your institution(s) from the **My Libraries** dropdown (A).
2. Choose the **Comparator Group(s)** you would like to use from the dropdown (B).
3. Select the **Analysis Type**.
4. Click **RUN REPORT**
5. Results
   1. Collection - a count of all monograph items within your collection.
   2. Results - a combination of both your institution and the comparator group(s) that were added to the query.
   3. # of Titles - a graph visualization by LC classification, of the number of titles held by your institution and the comparator groups chosen in this query.
   4. Titles list - list of titles from the above graph, including a link to the WorldCat record.

Search Options

Within the analysis type, you can segment your search using **attributes** to focus on specific parts of your collection.

Analysis queries

Use one of four different analysis queries to compare your monograph collection to the monograph collections of other libraries.

<table>
<thead>
<tr>
<th>Analysis</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>Show titles held by either your libraries OR other libraries</td>
</tr>
<tr>
<td>Overlap</td>
<td>Shoe titles held by your library AND other libraries</td>
</tr>
<tr>
<td>Distinct</td>
<td>Show titles held ONLY by your library or group</td>
</tr>
<tr>
<td>Gap</td>
<td>Show titles held ONLY by other libraries (comparator libraries or lists)</td>
</tr>
</tbody>
</table>
