Why do I not see my library's branch location in WorldCat.org?

Last updated: Thu, 15 Sep 2022 21:31:00 GMT

Applies to

- WorldCat.org

Answer

Holdings display in WorldCat.org is limited to institutions with a unique OCLC Symbol. This means that holdings for branch libraries grouped under the same OCLC Symbol will appear for the main library listing. Individual branch locations will not display in library searches nor in holdings displays on individual items.
