Can I query for just serials or e-serials?

Last updated: Fri, 07 Aug 2020 12:26:40 GMT

Constructing queries for specific formats is best accomplished by using a WorldCat search index that corresponds to the material type. For examples, see Collection-level settings in query collections, WorldCat Selection Criteria.

Further instructions on using these indexes are available in Searching WorldCat Indexes. In particular, see the Material Type names and codes guide.
