I receive the error "The requested URL was rejected" when trying to access WorldCat.org

Last updated: Wed, 21 Sep 2022 14:44:36 GMT

Symptom

• When going to WorldCat.org, you receive an error message that says "The requested URL was rejected. Please consult with your administrator." The page title is Request Rejected and the message also gives your support ID.

Applies to

• WorldCat.org

Resolution

This is likely a browser error due to a corrupted cookie. Clear your browser's cache and cookies, close and reopen your browser, and go to WorldCat.org again. The site should then load without the error.
