How do I know which metasearch databases correspond to our selected Knowledge Base collections?

Last updated: Fri, 23 Sep 2022 15:07:06 GMT

Applies to

- WorldCat Discovery

Answer

The metasearch content databases are provided by vendors and they don't usually provide us a 1:1 match for databases and Knowledge Base collections. For this reason, libraries should use Knowledge Base collections to set their coverage as these are more customizable and more likely to correspond to an exact collection provided by a vendor.
