How can I set up Microsoft SQL Management Studio to do Database queries on a Hosted ILLiad site?

Last updated: Fri, 28 Oct 2022 20:26:42 GMT

Symptom

• You want to use Microsoft SQL Management Studio to do a query for the ILLiad Database

Applies to

• ILLiad

Resolution

Here are the steps to access the ILLiad Database so you can run Queries using Microsoft SQL Management Studio:

1. Follow the documentation for Setting up the ODBC Data Source Link. Wherever you see the ILLiadLink Login ID, you will replace it with the ILLiadLink Login ID OCLC gives you.
2. Open Microsoft SQL Management Studio. If you do not have it, you will need to install it.
3. Open a New Connection.
4. Put in the server name you also have in your ATLAS SQL Alias Manager. For example, abc-db.illiad.oclc.org in the Servername field.
5. Put the link name OCLC sent you in the login field.
6. Put the password OCLC sent you in the password field.
7. Click on Remember Password.
8. Click on Connect. Here is an example:
