Why can't I find Academic Search Premier in the Service Configuration list of Central Index databases?

Symptom

- Academic Search Premier, is listed as a Central Index Database, but it is not available to select in the Service Configuration > Metasearch Content > Default Databases and Licensed Content > Central Index Databases.

Applies to

- WorldCat Discovery

Resolution

Please select the Academic Search Complete Database in Metasearch Content and EBSCO will include the content from the other databases with the same Target ID# 1708, if you have access.

Here is a link to the Centrally-indexed collections to enable in Service Configuration (includes Target IDs for search box creation)
