Which discrete databases should be added to our Discovery search?

Last updated: Fri, 16 Dec 2022 20:26:28 GMT

Symptom

• We are seeing an error when searching articles in the WorldCat Discovery WorldCat database
• "There was an error while displaying your record."
• This article used to surface but it does not now.
• A permalink that we have saved is now going to an error screen in WorldCat Discovery

Applies to

• WorldCat Discovery

Resolution

Please go to the Metasearch Content menu of the OCLC Service Configuration. From there, verify that all of the discrete databases that the library subscribes to have been selected. Note: databases must be enabled as default to be searched outside WorldCat Discovery Advanced Search.

Please do not set the database to 'Treat as held', otherwise items outside of the library's holdings will show a holding statement in search results.

Additional information

Central Index databases can move: please follow that discussion at the OCLC Community Center.
