In February 2006, OCLC, in partnership with TCR (The Combined Regions), launched a hosted, web-based, national interlending service—UnityUK. Since 2006, OCLC has continuously developed the service to meet evolving technological and user demands.

UnityUK is powered by VDX, a standards-compliant interlibrary loan and document request management system. UnityUK enables users to:

- Search multiple library catalogues simultaneously
- View the bibliographic and location details of any items retrieved
- Place a request for an item
- Manage the request through its lifecycle, from request to receipt to return
- Manage incoming requests from other UnityUK libraries
- Manage ILL charges using IFM
- Run statistical and other reports
- Send email alerts to requesters when requests meet stated criteria
