Full-text links originate from knowledge base collections and from other sources. See how links are displayed in different areas of your WorldCat Discovery interface.

**About full-text links in WorldCat Discovery**

In WorldCat Discovery, full-text links are grouped into three separate types and display in different areas:

1. **Access Online**
2. **Other Links**
3. **More Information**

For more information about how the links display and to select when to display them, see [Full Text and Open Access Links](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Display_local_data/Full_text_link_display).

**Access Online**

Primary access online links are grouped together as the most likely to resolve to full-text content. On the detailed view, these links appear in the **Check Availability** section under within the **Access Online** accordion, as shown:
The links within Access Online determine the button that appears in the search results. If there are no primary links, there will be no full-text button in the search results.

The links used as the full-text button are determined based on the following order:

1. WorldCat knowledge base links
2. Local Holdings Record links
3. OPAC links
4. Open Access MARC 856 and 956 links

**Full-text link display names**

The display text of full-text links / buttons changes based on the source and format of the full-text item:

<table>
<thead>
<tr>
<th>SOURCE</th>
<th>DISPLAY TEXT OF LINK / BUTTON</th>
</tr>
</thead>
<tbody>
<tr>
<td>WorldCat knowledge base</td>
<td>Depending on the format type of the record in WorldCat Discovery:</td>
</tr>
<tr>
<td>SOURCE</td>
<td>DISPLAY TEXT OF LINK / BUTTON</td>
</tr>
<tr>
<td>---------------------------------------------</td>
<td>-------------------------------</td>
</tr>
<tr>
<td></td>
<td>Format</td>
</tr>
<tr>
<td></td>
<td>eBook/Print Book</td>
</tr>
<tr>
<td></td>
<td>eJournal/Print Journal</td>
</tr>
<tr>
<td></td>
<td>Article</td>
</tr>
<tr>
<td></td>
<td>Audiobook/Audio CD</td>
</tr>
<tr>
<td></td>
<td>Video/Misc.</td>
</tr>
<tr>
<td>Local Holdings Records</td>
<td>Access Online</td>
</tr>
<tr>
<td>OPAC</td>
<td>Access Online</td>
</tr>
<tr>
<td>Open Access MARC 856 and 956 links</td>
<td>Access Online</td>
</tr>
</tbody>
</table>

**Other Links**

Other Links consist of non-open access WorldCat MARC 856 links with first indicator 4 and second indicator 0. They are listed under the **Other Links** accordion in the **Availability** section. Other Links are not used for the **Access Online** button.
More Information

More Information links are links about content rather than links providing full-text access. These links consist of WorldCat MARC records with 856 fields with first indicator 4 and second indicator 1 or 2. They are listed in the View Description accordion under More Information. More Information links are not used for the Access Online button.
Print DDA fulfillment

Use custom text from Local Holding Records (LHRs) to support print Demand Driven Acquisitions (DDA) workflows. The custom text displays on the primary fulfillment button, which will link to your print book order form. The print DDA fulfillment button will appear on brief results, course reserves, and item detail pages in WorldCat Discovery.

If you are interested in using a Print DDA workflow, first contact your vendor to inquire about using Print DDA collections. Once a DDA collection is purchased through your vendor:

- Ask if your vendor works with OCLC to send Local Holdings Records for ongoing LHR data sync collections. Your vendor can include the required LHR information to surface the fulfillment button with custom text to your print book order form in WorldCat Discovery. See Local holdings records collection for more information about creating a data sync collection.
- If your vendor does not work with OCLC to provide these records, you can manually enter LHRs on your Print DDA collection records.
- Identify how you will handle updating the LHR once the item has been purchased through DDA.

The following must be included in the LHR for the custom text to display and link to the print order form.

Note: The links will inform the fulfillment button on brief and item details only when no knowledgebase links are present.

Printed: Sun, 31 May 2020 21:44:05 GMT
• 856 subfield u that contains the URL to the print book order form.
• 856 subfield x non-public note of <dda>. This is not required to be case sensitive.
  ◦ This subfield x alerts WorldCat Discovery to change the fulfillment button display in the interface.
• A subfield y with the desired custom text for the fulfillment button. Limit 25 characters.
  ◦ The language of the display button will reflect the text entered here.

The "Report a broken link" form

To enable a link to a "Report a broken link" form so it appears next to links to full-text resources, see Enable "Report a broken link" and receive emails. Broken link emails are sent to your library to the email address you configure in your settings. OCLC does not receive the emails sent to your library.
