Purchasing Requests

Last updated: Tue, 08 Nov 2022 17:05:21 GMT

Learn how to move requests to the Purchasing Requests queue and complete purchasing requests in Tipasa. The Purchase option allows you to track items you may wish to purchase, instead of borrowing via interlibrary loan. This feature allows you to input relevant data about the item you're purchasing, and tracks usage in OCLC Usage Statistics.

Note: Currently, the functionality allows tracking only, but future enhancements are planned.

**Edit and add Staff Notes**

All staff users within an institution can add, edit and delete notes. Any staff member may edit any existing notes. The original author displays in the left column with the most recently-edited-by user name appearing just below the note.

Note: Only staff with the **WorldShare ILL Admin** role will be able to see the name of the author of the staff notes. Staff with the **WorldShare ILL User** role will see a date and time stamp for when the note was created/updated along with the name of the library.

The most recently added note will display at the top of the Staff Notes tab. Edited notes display based on the updated date and time.
