Caution: The following stanza is needed if using old URLs.

In order to provide access to resources that use https, your EZproxy server must be configured with an SSL certificate.
A Hosted EZproxy Include File is available for this resource. Hosted EZproxy customers will receive automatic updates with OCLC’s latest version of this stanza. Note: Hosted EZproxy customers in the Americas using self-service may reference the Include File by adding the following line to config.txt:

IncludeFile databases/frost.txt
