2009-06-24
In order to provide access to resources that use https, your EZproxy server must be configured with an SSL certificate.

Institute for Scientific Information (ISI) products such as Web of Knowledge and Web of Science are supported by EZproxy 2.0j GA (2003-06-02) or later using the configuration that appears at www.thomsonscientific.com/support/faq/proxy4/.

Session Expired

If after applying this configuration, you get "Session Expired" errors, check to see if your server is suffering from a maximum virtual host limit error.
