In order to provide access to resources that use https, your EZproxy server must be configured with an SSL certificate.

Canadian Pharmacists Association products require EZproxy 3.2a (2005-03-28) or later.

In these configurations, replace \texttt{yourusername} with your institution's username and \texttt{yourpassword} with your institution's password. The starting point URLs for these database stanzas will look like:
replacing `ezproxy.yourlib.org:2048` with the name and port of your own EZproxy server.

Additional information appears at [https://www.pharmacists.ca/function/et/eFaqs.cfm#30](https://www.pharmacists.ca/function/et/eFaqs.cfm#30).
