2006-08-06
In order to provide access to resources that use https, your EZproxy server must be configured with an [SSL certificate](https://help.oclc.org/Library_Management/EZproxy/Database_stanzas/Siku_Quanshu).

Siku Quanshu requires EZproxy 4.0a GA (2006-08-02) or later.

Since libraries install their own copies of Siku Quanshu on their own servers, there is no single, correct definition for this database. The general configuration is:

```
Option UTF16
  Title Siku Quanshu (updated 20060806)
  URL http://skqs.yourlib.org
  DJ skqs.yourlib.org
  Option NoUTF16
```

replacing both instances of `skqs.yourlib.org` with the name of your Siku Quanshu server.
