WorldCat Discovery release notes, February 2018

Introduction

The following release notes are for the February 28, 2018 release of WorldCat Discovery:

- Users with limited access to some full-text links can now see all e-links from search results, and WorldCat e-links are more reliable with MARC 008 publication dates.

Many of these enhancements are the direct result of your feedback.

Recommended actions

Consider configuring the "Access Online" button if your institution limits access of some e-links based on the user.

Include Request ID with problem reports

When reporting an issue with WorldCat Discovery, it is extremely helpful to include the Request ID. The Request ID is found at the bottom of the screen on which the issue occurred. Including this information allows us to directly trace what happened on the request we are troubleshooting.

New features and enhancements

Configure "Access Online" to display one or all e-links

Institutions with a unique need to display all primary "Access Online" e-links on the search results can configure the "Access Online" button to display all e-links. While this configuration can help many institutions to serve multiple e-links to users, we do not recommend this setting as the default for the majority of users, as the primary expectation is for the "Access Online" button to take the user directly to the material available online.

No changes to the existing "Access Online" button have been made unless this opt-in configuration is selected.
Configure the "Access Online" button to send the user to the first e-link or to display all e-links in OCLC Service Configuration > Full Test and Open Access Links > WorldCat Local Search Results // WorldCat Discovery Search Results and Detailed Views > Display primary links on search results and Course Reserves:

If two or more primary links are present for a record, and the setting for "Display all primary links" is enabled, users see the "Access Online" button display with an expansion indicator:

Selecting the "Access Online" button expands the "Access Online" links into a scrolling tray filled with primary links, as configured by your institution:
Please note that only the following primary links on search results and Course Reserves will display:

- WorldCat knowledge base links
- Local Holding Records 856 links
- OPAC links
- Master WorldCat record 856 links
- Non-WorldCat record 856/956 links

When only one primary link is associated with a search result, and the "Display all links" setting in Service Configuration is enabled, the "Access Online" button will behave as a link everywhere it is visible. The icon changes to indicate when there is only one available link:

When the "Display all links" setting in Service Configuration is enabled, the "Access Online" button will anchor a user to
the full list of primary links available for that record:

Report a Broken link from search results

When the "Display all links" setting in Service Configuration is enabled, users can "Report a broken link" from search results and Course Reserves. "Report a broken link" is only primary for links:
WorldCat knowledge base links enhanced with MARC 008 field

In cases where there is no MARC 949 $g publication date, WorldCat Discovery will send MARC 008 field positions 07 to 10 for publication dates when constructing WorldCat knowledge base links for articles.

Bug fixes

Corrected resource sharing button for Level 2 fulfillment groups: Custom URL

Institutions can configure and use the additional Resource Sharing button type of Custom URL for their Level 2 fulfillment button. Previously, this option may not have worked for all institutions.

To configure and use this setting, members must have a Level 2 fulfillment group configured with OCLC and set up in OCLC Service Configuration > My WorldCat.org > Place Hold/Request Buttons > Resource Sharing (Any Level) and select Configure an additional button.

Select Custom URL from the Type of button configuration drop-down menu and enter your URL into the blank field.
Configure the **Custom URL** to appear for your Level 2 fulfillment group in OCLC Service Configuration > My WorldCat.org > Place Hold/Request Buttons > For items owned by your "Level 2":

```
* Additional Resource Sharing Button
Label: Request Item
Add Translated Display Text
For best display, keep this label under 40 characters.
This button text will be used in the select menus below where you will choose when to display the button.
☐ Open in a new tab/window when clicked. Does not apply to WMS.

Type of button configuration: Custom URL

Enter custom URL: https://yourcustomurl.com
``` 

**New content**

This is a list of new databases added to WorldCat Discovery, WorldCat Local and WorldCat.org since our last update.

You can enable these databases as search options in the Licensed Content and Databases module of the OCLC Service Configuration site. **Please remember that your library must have a valid subscription to these databases in order to enable them.**

**Available in WorldCat Discovery, WorldCat Local and WorldCat.org**
