Horizontal menu
Last updated: Wed, 27 Nov 2019 18:10:18 GMT

Link:  See a live example.

View:  View source code in CONTENTdm Cookbook Demo Site.

This customization was originally developed by Jennifer Howard of Frontier Nursing University for their Frontier Digital Depot.

The default CONTENTdm responsive website has a main menu accessible via a “hamburger” icon in the upper right corner. Using a small number of custom CSS rules you can alter this menu so that it appears as a horizontal list of links across the header on larger screen sizes. This customization preserves the mobile-friendly “hamburger” menu for phone-sized screens.
