The WorldCat Digital Collection Gateway is a self-service tool for harvesting the metadata of your unique, open-access digital content into WorldCat. Once there, your collections are more visible and discoverable to end users who search WorldCat as well as other popular websites.

**Get started**

- Find information about getting started with the WorldCat Digital Collection Gateway.
  - About WorldCat Digital Collection Gateway
  - Enable WorldCat Sync from CONTENTdm Administration
  - Information for metadata contributors
  - Register to use the WorldCat Digital Collection Gateway

**Use the Digital Collection Gateway**

- Use this guide to lead you through the steps for using the WorldCat Digital Collection Gateway to add records to WorldCat from OAI-PMH compliant repositories or your CONTENTdm metadata records.
  - Overview
  - Collection configuration and metadata crosswalking
  - Manage users and repositories
  - Prepare a collection for the Gateway
  - View and edit the metadata map
  - Synchronization with WorldCat
  - View synchronization reports

**Digital Collection Gateway training**

- Find training on the Digital Collection Gateway.

• Frequently asked questions

Find frequently asked questions about the Digital Collection Gateway.

◦ Can I create a collection description in Gateway?
◦ Can I register more than one CONTENTdm user with the WorldCat Digital Collection Gateway?
◦ Can I register more than one repository with the Digital Collection Gateway?
◦ Can I tell the Gateway how to display a thumbnail for my digital content?
◦ Can more than one person from my organization use the WorldCat Digital Collection Gateway?
◦ Can one source metadata field be mapped to multiple WorldCat.org display fields?
◦ Does all metadata have to come from source data, or can I specify more collection-level data in mappings?
◦ Does my use of the Gateway make my organization a member of OCLC?
◦ How do I create a collection description in Gateway?
◦ How will duplicates be handled? For example, if my organization has a rare book that we’ve digitized and harvested, what happens if another institution harvests that same book?
◦ In the Manage Accounts tab of the Gateway I notice that I can select a repository type from a pull-down list. Are there different features available for different repository types?
◦ Is there a suggestion on how I should configure data such as language codes?
◦ It appears that some of my records were not harvested to WorldCat. How can I tell what happened?
◦ I noticed the Gateway checking my repository to see if it supports metadata prefix “oclc_dc”. What is this?
◦ I’m using Connexion digital import to load records into one of my CONTENTdm collections. Should I use the WorldCat Digital Collection Gateway?
◦ Metadata in my repository is contributed by several different organizations. How can these organizations be given attribution in WorldCat?
◦ My server configuration has changed. How do I change the corresponding harvest URL in the Digital Collection Gateway?
◦ The OAI-PMH protocol allows the transfer of any metadata format that has a valid, addressable schema/namespace. My repository can support Dublin Core and MARC. Since we can supply MARC, can that be used?
◦ What if there are only certain collections that I want Gateway to harvest?
◦ What if there are only certain sets that I want Gateway to harvest?
◦ What is the difference between Replace all Records and Add New Records
◦ What is the WorldCat Digital Collection Gateway?
◦ When I am viewing my digital records in the WorldCat Digital Collection Gateway, the number of records in a collection sometimes changes
◦ When I log into the WorldCat Digital Collection Gateway, am I able to harvest my entire repository as one set?
◦ Why am I getting errors in the Gateway when I attempt to use the Qualified Dublin Core metadataPrefix with my DSpace server?

Troubleshooting

Find frequently asked questions (FAQ) and troubleshooting steps (Troubleshooting).

- Can the Gateway support a non OAI-PMH compliant repository?
- Can I run our Digital Collection records through a Data Sync Collection?
- Can we create a collection for our Digital Collection Gateway records?
- How can I remove duplicates from our digital collections?
- How can we get an account added to our Digital Collection Gateway?
- How can we run a scan/delete of our WorldCat holdings without deleting all the digital collections' holdings for our symbol?
- How do I add a repository to my Digital collection gateway account?
- How do I add a user to our Digital Collection Gateway?
- How do I cancel the email delivery of the Digital Collection Gateway monthly report?
- How do I delete a collection from Digital Collection Gateway?
- How do I edit the indicators in the 856 field?
- How do I manually sync a collection through the Digital Collection Gateway?
- How do I map the data from the 024 field into an 856 field?
- How do we change our harvest URL inside the Digital Collection Gateway?
- We are migrating our collections to a new repository. How do we delete the links to our old repository from WorldCat?
- I've registered a Digital Collection Gateway institutional profile, and now I want to register an account in DCG, but I don't know the key. Please help me get the key.
- Is it a good thing to map every field in the bib record just in case you need to edit something later on?
- Is it possible to specify a custom metadata Prefix in our harvest URL?
- Is there a way to delete WorldCat records that have been harvested through Digital Collection Gateway?
- Is there a way to set up automated harvesting from repositories?
- I am having trouble adding a user account to Digital Collection Gateway. I get an invalid key notification.
- I have mapped a link to the "view online" button, but the link is not showing up in WorldCat
- I would like to add myself as a user in Digital Collection Gateway but it asks for a key. Where do I get a key?
- On the Collection Details screen there is an option to "Replace all". What does the "Replace all" option do?
- Our institution has files web-hosted by a software provider. How can these records be uploaded to OCLC and made visible in WorldCat?
- We are getting a 500 error when trying to harvest our records.
- We want to change harvest URLs, and we use CONTENTdm as a repository.
- We would like to update our harvest URL inside OAlster.
- Where do I find my digital collection gateway key?
Where do I find my OAI-PMH base URL?

- Where would I go to remove a collection from an OAI feed?
- Why can we not change our collection to use the Qualified Dublin Core standard?
- Why do I keep receiving a validation error related to the BLvl and the 773 field of our records?
