Release Date: April 26, 2018

Introduction

The following release notes are for the April 26, 2018 release of WorldCat Discovery.

WorldCat Discovery April release highlights

Libraries can now configure the WMS Level 1 Place Hold form to display fields most relevant to their collections, and can configure the display of 856 links from non-WorldCat master records.

Include Request ID with problem reports

When reporting an issue with WorldCat Discovery, it is extremely helpful to include the Request ID. The Request ID is found at the bottom of the screen on which the issue occurred. Including this information allows us to directly trace what happened on the request we are troubleshooting.

New features and enhancements

WMS Level 1 Place Hold configurations support all library sizes

Institutions using the WMS Place Hold fulfillment action can use Place Hold form configurations to ensure the Place Hold form meets the needs of your diverse collections.

Library staff can manage configuration based on form request types and elements:
<table>
<thead>
<tr>
<th>Request Type*</th>
<th>Configure ‘I need’ request type to on or off?</th>
<th>Configure ‘Dates I need it’ hold request date display to on or off?</th>
<th>Configure ‘I want it from’ shelving location display to on or off?</th>
<th>Configure ‘Item description(s)/Note’ display to on or off?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Any Copy</td>

<td>Y</td>

<td>Y</td>
</tr>
<tr>
<td>Specific Copy/Volume</td>
<td>Y</td>
<td>Y</td>
<td>N/A</td>
<td>Y</td>
</tr>
<tr>
<td>Special Request</td>
<td>Y</td>
<td>Y</td>
<td>Y</td>
<td>N</td>
</tr>
</tbody>
</table>

* At least one request type must be configured when using the WMS Level 1 Place Hold functionality.

The Place Hold form “Request Type” will continue to default to a “Request Type” based on the material type – serial or non-serial. The default “Request Type” will change based on the configured “Request Types” as follows:

<table>
<thead>
<tr>
<th>Material Type</th>
<th>Default Place Hold Request Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-Serial</td>
<td>1. <strong>Any Copy</strong>, if configured</td>
</tr>
<tr>
<td></td>
<td>2. <strong>Specific Copy/Volume</strong>, if Any Copy is not configured</td>
</tr>
<tr>

<td>3. <strong>Special Request</strong>, if Specific Copy/Volume is not configured and Any Copy is not configured</td>
</tr>
<tr>

<td>1. <strong>Specific Copy/Volume</strong>, if configured</td>
</tr>
<tr>

<td>2. <strong>Any Copy</strong>, if Specific Copy/Volume is not configured</td>
</tr>
<tr>

<td>3. <strong>Special Request</strong>, if Specific Copy/Volume is not configured and Any Copy is not configured</td>
</tr>
</tbody>
</table>
