Why is WorldCat.org linking to an item which has the same title but a different format?

Last updated: Tue, 18 Oct 2022 18:20:33 GMT

Applies to

- WorldCat.org
- WorldCat Discovery
- WorldCat Local

Answer

We group related items together, so that members looking at the record of an item with one format can link to a related record in a library's ILS with a different format. Selecting the option to view "this edition" in WorldCat will prevent the links to related editions from showing.
